

What do you think are the key environmental challenges which will impact the EPA in the future?

- Odour because this is hard to measure - Dust due to increasing traffic - Outdating industry with outdated infrastructure, such as open tip and refinery.

What aspects of the EPA's work do you value and wish to preserve in the future?

- There's lots of room for improvement. I think EPA is not well known enough by general public and as an authority body, EPA should be more aggressive. I felt that EPA is very passive.

How can the EPA effectively work in partnership with other government agencies to meet the environmental challenges of the future?

No Answer

How can the EPA's role in safeguarding the community against the health impacts of pollution be clarified or strengthened?

Should act more aggressively.

How could statutory frameworks more effectively prevent future environmental risks and land use conflicts?

No Answer

What role should the EPA play in emergency management?

Ensuring the general public health is protected. For example, when scrap metal tip in Brooklyn was on fire on 19 Oct 2015, there's no warning from EPA about dust polluting or such. It comes from CFA/ MFB. If it has anything to do with environment being polluted and impacting public health, EPA should get involved too.

How can the EPA better identify and, where necessary, address problems that are the result of past activity?

Be more aggressive. Use your power.

What role should the EPA play in improving environmental outcomes beyond those necessary to safeguard human health?

Ensure both environment and public health is protected. Heavy penalty and punishment on business not regulated to protect environment and general public.

What role should the EPA play in reducing greenhouse gas emissions?

Heavy penalty! We only have one Australian, one earth and money can't buy either back when the world we living in now is no longer habitat!!

How do you see environmental justice being applied to the work of the EPA?

No Answer

What can we adopt from other regulators and regulatory models to implement best-practice approaches and ensure that the EPA can rise to key future challenges?

No Answer

Are there any other issues relevant to the Terms of Reference that you would like to raise?

No Answer

What can the EPA do to avoid potential future problems?

Be more aggressive and take advice VERY SERIOUSLY. Majority of the past polluted event could be prevented. Such as scrap metal tip fire in Brooklyn. It has been long suggested those outdated industry should be removed from inner Melbourne but nothing happened. And see what happened when it was on fire, realising all toxic black smoke into the air, ruining what could have been a fresh and breezy evening, and affecting thousands of lives. Should look into how many people were affected y that. Won't be surprised someone with breathing problem would have struggle that night.
